

Round 'Em Up

Info

Write a program that prompts the user to input five decimal numbers. The program should then add the five decimal numbers, convert the sum to the nearest integer, and print the result.

Example

```
"Please enter 5 decimals:" 1.912 0.234 224 13.46 .11111
```

```
"Your total (rounded to the nearest integer) is:" 240
```

Input

- Five Decimal Values -> Float

Output

- Rounded Total Value -> Integer
